# MULTIFAMILY NEEDS

For years the multifamily industry has waited for a cabinet door with cutting-edge European design trends and the durability to match the demanding lifestyle of residents. Having never been offered to the multifamily industry before, Leedo is proud to be the first U.S. manufacturer of the TruTouch Thermofused Technology (T4) cabinet door. Finally – A true alternative to a wood veneer door.

## CUSTOMER BENEFITS

**Gorgeous Appearance:** TruTouch features a unique blend of innovation and the latest manufacturing trends in textured surfaces. Available across both product platforms (framed and frameless), TruTouch brings the visual qualities of the finest wood furniture to your next multifamily project. With its versatility, this family of finishes will satisfy traditional to contemporary lifestyles to match a required need in today's marketplace.

**Maximum Durability:** A look that lasts. The TruTouch finish demonstrates superior resistance to scratches, scuffs, stains, and wearing without sacrificing color consistency or texture. The end product is a quality cabinet that cleans easily and requires minimal surface maintenance.

Thermofused  
Technology

## WHAT IS TRUTOUCH

Leedo's TruTouch Thermofused Technology (T4) replicates both the beauty and feel of natural wood cabinets, producing a visually stunning, realistic high-end product with extraordinary durability.

## THE TECHNOLOGY

TruTouch contains a resin-impregnated, high-definition, decorative overlay that is pressed directly onto Leedo's industrial-grade engineered wood substrates. Using high heat and pressure the overlay is embossed, creating a detailed **wood veneer appearance** to heighten the realism of the printed grain. In this state-of-the-art process called "register embossed thermofused lamination", the resin saturated decorative finish fuses with the surface of the board, producing an irreversible bond with an immaculate finish.

# TRADITIONAL LONDON
