LEEDO FRAMED DOOR STYLE COLLECTIONS

Leedo framed cabinetry is offered in six different collections. Choose from our Maple, Paint, Oak, Thermofoil, TruTouch or Laminate door styles to create the perfect look for any project.

Maple — Maple has been the choice of wood for fine furniture craftsmanship for centuries. Maple is a strong wood with a subtle grain pattern and a smooth, uniform appearance that works well with both contemporary and traditional settings. Available in a wide selection of door styles and finishes, the natural beauty of maple cabinetry will enhance the style and design of any home.

Paint — Beautiful paint requires the perfect canvas. Our enamel painted door styles start with a dense fiberboard that provides the perfect canvas for painted cabinetry. The end product is visually superior to painted wood products that can have visible grain patterns and cracks at door joints. Our painted doors have a consistent and smooth finish. Timeless and suitable for any décor, painted cabinetry is always in style.

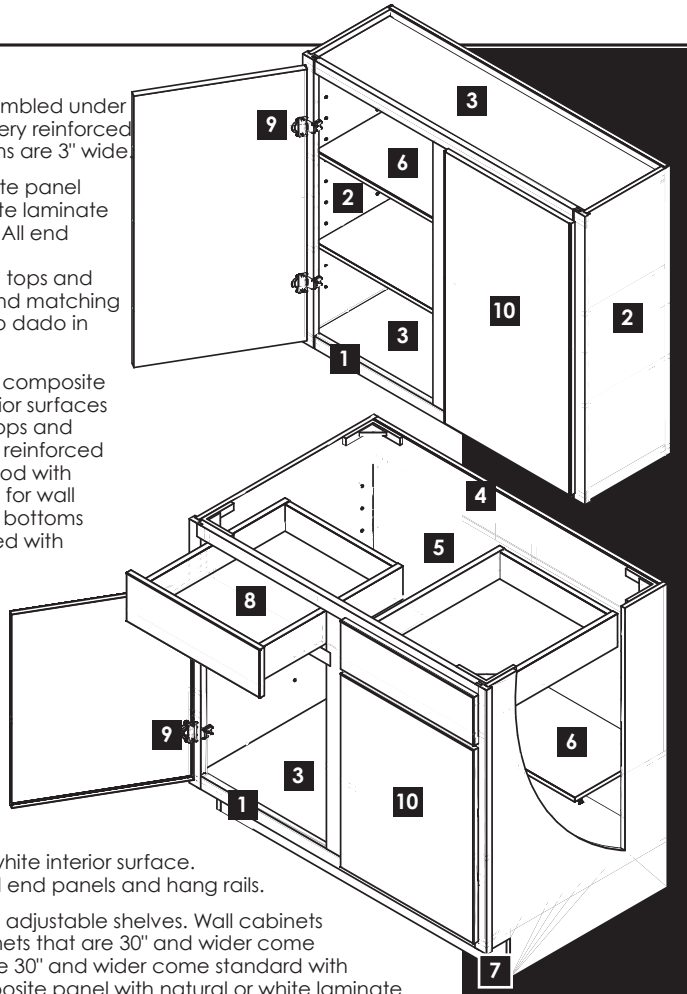

Oak — Oak hardwood has a pronounced grain pattern and texture that proudly displays the beauty of natural wood. These inherent characteristics of oak help to mask minor dents and scratches. This classic wood and its unique visual qualities have made it a popular choice for traditional décor.

Thermofoil — Thermofoil door styles are created through an intense heat and pressure bonding process where rigid vinyl is applied to a sculpted fiberboard to provide a uniform and durable finish. Offered in a wide variety of exterior colors, we also offer your choice of white or natural maple melamine back. The simple clean lines of our thermofoil door styles create a clean look that works in almost any design or décor.

TruTouch — TruTouch is a textured, high-definition decorative finish created through an embossed thermofused lamination process. Through this state-of-the-art process, the decorative overlay is applied to an industrial grade engineered wood substrate to create a detailed wood veneer appearance. TruTouch finish has superior resistance to scratches, scuffs, and stains yet has the visual beauty of fine wood furniture.

Laminate — Laminate door styles have an appearance of wood and are available in smooth and textured finishes. The slab styling of our laminate doors provides a very durable finish that is easy to clean and perfect for any modern or contemporary design.

FRAMED CONSTRUCTION AND OPTIONS

- 
- 1 FRONT FRAME** — 3/4" thick kiln dried solid hardwood. Assembled under pressure with mortise and tenon construction. Frame joinery reinforced with glue and nails. Stiles and Rails are 1-1/2" wide. Mullions are 3" wide.
- 2 END PANELS** — **Standard:** 1/2" thick wood based composite panel dadoed to receive tops and bottoms, with natural or white laminate interior surface and matching laminate exterior surfaces. All end panels are inserted into dado in face frame.
Plywood Upgrade: 1/2" thick plywood dadoed to receive tops and bottoms, with natural or white laminate interior surface and matching laminate exterior surfaces. All end panels are inserted into dado in face frame.
- 3 TOP/BOTTOM PANELS** — **Standard:** 1/2" thick wood based composite panel with natural or white laminate on exterior and interior surfaces for wall cabinets and interior surface for base cabinets. Tops and bottoms are set into dados in end panels and front rails, reinforced with glue and staples. **Plywood Upgrade:** 1/2" thick plywood with natural or white laminate on exterior and interior surfaces for wall cabinets and interior surface for base cabinets. Tops and bottoms are set into dados in end panels and front rails, reinforced with glue and staples.
- 4 HANG RAILS** — **Standard:** Wall and base cabinets have 1/2" thick wood based composite hanging rail. Assembled between the end panels at the top and bottom of cabinets behind the back panel. **Plywood Upgrade:** Wall and base cabinets have 1/2" thick plywood hanging rail. Assembled between the end panels at the top and bottom of cabinets behind the back panel.
- 5 BACK PANEL** — **Standard:** 1/8" thick hardboard with natural or white interior surface. Securely glued with industrial grade hot melt to end panels and hang rails.
Plywood Upgrade: 3.6mm thick plywood with natural or white interior surface. Securely glued with industrial grade hot melt to rabbeted end panels and hang rails.
- 6 SHELVES** — Base cabinets come standard with half depth adjustable shelves. Wall cabinets feature full depth adjustable shelves. Butt door wall cabinets that are 30" and wider come standard with 3/4" thick shelves. All base cabinets that are 30" and wider come standard with 3/4" thick shelves. **Standard:** 1/2" thick wood based composite panel with natural or white laminate on both faces and matching edgeband on front edge. **Plywood Upgrade:** 1/2" thick plywood panel with natural or white laminate on both faces and matching edgeband on front edge.
Upgrade: 3/4" shelf thickness available. **Full depth shelf (FDS) upgrade:** available on select base cabinets.
- 7 TOE KICK** — **Standard:** 1/2" thick unfinished wood based composite panel assembled between end panels. Toe kick is 4-1/2" high for standard base cabinets and 5-1/2" high for universal access base cabinets. **Plywood Upgrade:** 1/2" thick unfinished plywood panel assembled between end panels. Toe kick is 4-1/2" high for standard base cabinets and 5-1/2" high for universal access base cabinets.
No Toe Kick (NTK) Upgrade: available on select vanity cabinets.
- 8 DRAWER BOX** — **Standard:** 1/2" thick laminate wood based composite panel sides and ends. Rabbet-jointed, assembled with glue and nails. Drawer bottoms are 1/4" laminated composite panel. Bottom is captured in dados on ends and sides, and secured in place with hot melt.
Plywood Upgrade: 1/2" thick plywood sides and ends. Rabbet-jointed, assembled with glue and nails. Drawer bottoms are nominal 1/4" laminated plywood. Bottom is captured in dados on ends and sides, and secured in place with hot melt. **Plywood Dovetail Upgrade:** 1/2" thick plywood sides and ends. Dovetail construction. Drawer bottoms are nominal 1/4" laminated plywood. Bottom is captured in dados on ends and sides, and secured in place with hot melt. **Undermount Plywood Dovetail Upgrade:** 1/2" thick clear coated plywood sides and ends. Dovetail construction. Drawer bottoms are nominal 1/4" laminated plywood. Bottom is captured in dados on ends and sides, and secured in place with hot melt.
- DRAWER GUIDE OPTIONS** — **Standard:** 100lb epoxy coated side mount drawer guides.
Full extension upgrade: Side mount full extension ball bearing guides.
Undermount soft-close upgrade: 7/8" Extension 75lb undermount guide with integrated soft-close. Only available with Undermount Plywood Dovetail drawer box.
- 9 HINGE** — **Standard:** 6-way adjustable, concealed steel hinges. **Upgrade:** 6-way adjustable, concealed steel hinges with soft-close feature.
- 10 DOORS** — Please refer to individual door style specifications

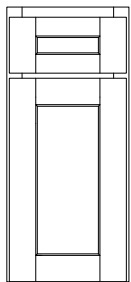

ALTERED DEPTH (AD) OPTION — Most wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18" or 21" depth. AD availability is noted by cabinet.

BANDED WALL CABINET OPTION — All wall cabinets can be ordered with edge banded end panels.

LEEDO EURO DOOR STYLE COLLECTIONS

Leedo Euro cabinetry is offered in five different collections. Choose from our Maple, Paint, Thermofoil, TruTouch or Laminate door styles to create the perfect look for any project.

Maple — Maple has been the choice of wood for fine furniture craftsmanship for centuries. Maple is a strong wood with a subtle grain pattern and a smooth, uniform appearance that works well with today's clean contemporary settings. Available in a wide selection of door styles and finishes, the natural beauty of maple cabinetry will enhance the style and design of any home.

Paint — Beautiful paint requires the perfect canvas. Our enamel painted door styles start with a dense fiberboard that provides the perfect canvas for painted cabinetry. The end product is visually superior to painted wood products that can have visible grain patterns and cracks at door joints. Our painted doors have a consistent and smooth finish. Timeless and suitable for any décor, painted cabinetry is always in style.

Thermofoil — Thermofoil door styles are created through an intense heat and pressure bonding process where rigid vinyl is applied to a sculpted fiberboard to provide a uniform and durable finish. Offered in a wide variety of exterior colors, we also offer your choice of white or natural maple melamine back. The simple clean lines of our thermofoil door styles create a clean look that works in almost any design or décor.

TruTouch — TruTouch is a textured, high-definition decorative finish created through an embossed thermofused lamination process. Through this state-of-the-art process, the decorative overlay is applied to an industrial grade engineered wood substrate to create a detailed wood veneer appearance. TruTouch finish has superior resistance to scratches, scuffs, and stains yet has the visual beauty of fine wood furniture.

Laminate — Laminate door styles have an appearance of wood and are available in smooth and textured finishes. The slab styling of our laminate doors provides a very durable finish that is easy to clean and perfect for any modern and contemporary design.

EURO CONSTRUCTION AND OPTIONS

1 END PANELS — 5/8" thick (16mm) wood-based composite panel with matching laminate exterior surfaces. Construction holes of 8mm to receive wood dowels of horizontal components and grooved at the rear end to receive the back panel.

2 TOP/BOTTOM PANELS — 5/8" thick (16mm) wood-based composite panel attached to the end panels with wood dowels and glue. Base bottom also rests over the toe kick and rear stretcher for better support. The tops and bottoms are grooved at the rear end to receive back panel.

3 HANG RAILS — 5/8" thick (16mm) wood-based composite panel. Hang rails are set underneath the top panel and above the bottom panel, always concealed behind the back panel. Our hang rails utilize wood dowel and glue construction. Cabinets 30" or wider feature a pocket screw at the center across the top and bottom for better strength.

4 BACK PANEL — 3mm hardboard laminated on one side in maple grained, white, or matching laminate exterior surface. Fully captured and stapled to end panels, bottom and top or upper stretcher for bases.

5 SHELVES — Wall cabinet features full depth adjustable shelves with symmetrical shelves drilling patterns. The Base cabinet features a half depth shelf with a frontal lock-in-place shelf clip. **Standard:** 5/8" thick (16mm) wood-based composite panel with maple or white laminate on both surfaces and matching edgeband on the facing edge. **Upgrade Option:** 3/4" shelf thickness available. **Full Depth Shelf (FDS) Upgrade Option:** available on select base cabinets.

6 TOE KICK — **Standard:** 5/8" thick (16mm) unfinished wood-based composite panel. Toe kick is 4" high.
No Toe Kick (NTK) Upgrade Option: available on select vanity cabinets

7 BASE STRETCHERS — 5/8" thick (16mm) unfinished wood-based composite panel strips 3-3/4" width, running from left to right on the front and rear end at the top of the base cabinet. Frontal stretcher features matching exterior edgebanding on the facing side.

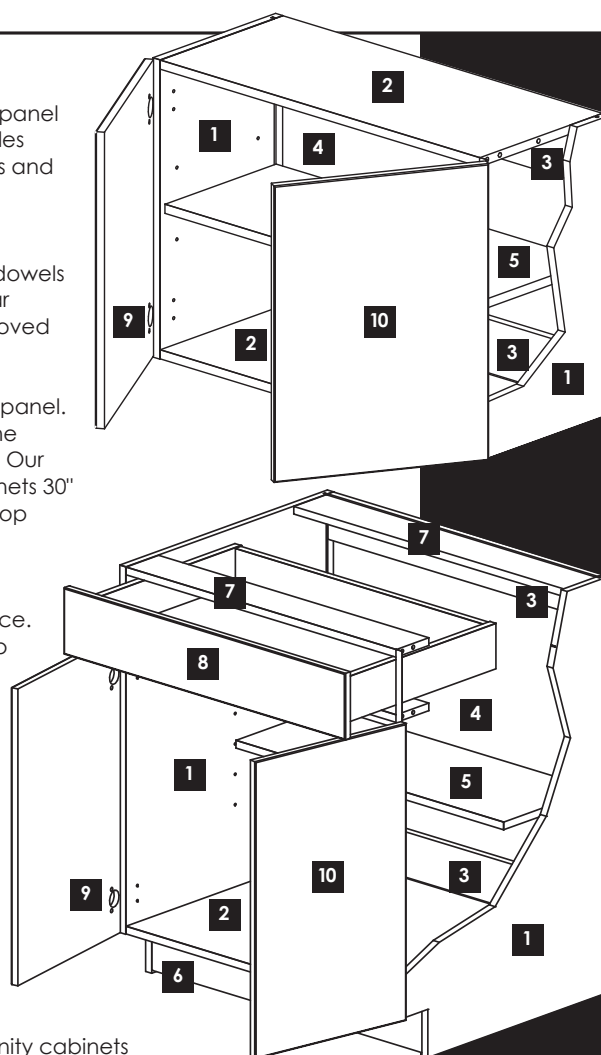

8 DRAWER BOX — **Standard:** Metal drawer box with 5/8" thick particleboard drawer bottom and back with white epoxy coated partial roller wheel extension drawer guide.
Upgrade Option: Soft-close attachment for metal drawer box.

Upgrade Particleboard Drawer Box Option: Five piece 5/8" thick particle-board sides and ends, 1/8" captured drawer bottom. Drawer parts laminated white or maple grained. Partial extension 100lb drawer guide is standard with this option. **Upgrade Option:** Full extension, under mount drawer guide with integrated soft-close for particleboard drawer box.

9 HINGE — **Standard:** 6-way adjustable concealed clip on hinges with 107 degree opening.
Upgrade Option: Soft-close feature.

10 DOORS — Please refer to individual door style specifications

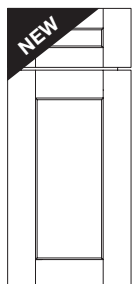

ALTERED DEPTH (AD) OPTION — Select wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18" or 21" depth. AD availability is noted by cabinet.

INDEX AND WARRANTY

CABINET CARE GUIDE

A soft cotton cloth dampened with warm water is usually sufficient to clean your cabinets. If more thorough cleaning is required, use one of the following cleaning solutions:

- A mixture of dish washing liquid and warm water
- A mild all-purpose cleaner. **Make sure it does not contain ammonia, silicone, or acid.**

Using the mildest cleaning solution will successfully clean your cabinets. Stronger products may damage or discolor your cabinet finish and are not recommended. After cleaning, wipe all surfaces with a clean, damp cloth. Dry immediately, using another soft, clean cloth.

SPILLS

Clean spills immediately. Prolonged exposure to spills, including food, water or other liquids, or grease spills can cause permanent discoloration or damage to your cabinet's finish.

CLEANING PRODUCTS TO AVOID

- Harsh chemicals including ammonia and bleach
- Abrasive cleaning products such as tub and sink cleaners scouring powder, scouring pads, or steel wool
- Sponges or dish clothes. They may contain particles that could scratch your cabinets, or they may contain food and oil residue
- Solvent-based or petroleum-based products such as mineral spirits, nail-polish removers or paint thinners
- Silicone-based cleaning, waxing or polishing products

REGULAR DUSTING

Use a clean, soft, lint-free cotton cloth for regular dusting. Packaged dusting sheets are not required or recommended. **Do not use pre-moistened dusting sheets or aerosol products specified for dusting.**

WAXING AND POLISHING

Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance.

WARRANTY

Thank you for selecting Leedo Cabinetry. Leedo works hard to provide an excellent product at a very competitive price. We guarantee all Leedo products for a period of One (1) year from the date of the completion of project installation to be free of defects in materials and manufacturing. During this period we agree to replace, at not cost to the owner, any portion of our work that is found defective.

While Leedo guarantees all structural aspects of our products for a period of one year, the following exclusions do apply:

- Due to the naturally occurring variations in wood, we do not guarantee uniformity of color, tone or grain pattern; nor do we guarantee that stain or finish colors will be free of minor inconsistencies caused by natural variations in pigments and materials.
- Hairline cracks or visible joint separations are considered normal changes that can occur with wood products based on environmental conditions.
- Damage caused by normal wear and tear, abuse, neglect, misuse, alterations, water damage, or other environmental conditions such as exposure to extreme temperatures or humidity.
- Damage caused by exposure to excessive heat sources.
- Work done by others, including refinishing or removal of cabinets.
- Thermofoil cabinetry installed without protection from excessive heat sources. Heat shields and/or fillers and overlays should be used to protect cabinetry near appliances that emit heat.
- Touch-ups, door and drawer adjustments, or cosmetic work.
- Color changes that may occur due to natural aging of the wood or due to exposure to either natural or artificial light.
- Discoloration or dullness in the finish or wood stain that may occur after exposure to ultraviolet light.
- Small or hairline cracks on painted product that may become visible at connecting joints. Please refer to painted product disclosure.

Leedo Manufacturing will make the final determination on any warranty-related items. Should a defect in materials or workmanship occur, excluding those noted above, Leedo maintains the right to repair or replace the product at our discretion.

PRODUCT DISCLOSURE

Characteristics of Painted Finishes on Wood Cabinetry

Leedo works hard to provide an excellent product at a very competitive price. We select the best cabinet material suitable for the manufacturing of a finished cabinet that meets our customers needs and KCMA testing. Our machining, assembly, and finishing procedures operate together to provide the highest quality of performance and appearance that our customers require to match the demanding lifestyle of their end users. Our finishing materials and application methods are consistently tested / inspected for quality and consistency using the latest technology.

Wood of all species is hygroscopic, meaning that it is subject to the humidity and temperature of its environment. It will lose or gain moisture and consequently shrink or swell depending on the environment. Even protective coatings cannot prevent this movement; they merely impede the process.

When the final product is painted, the solid colored paints and glazes mask the joint on assembled wood components. Due to the naturally occurring variations in wood that are beyond Leedo's control, we do not guarantee that the connecting joints will remain hidden by the paint. The wood components shrink or swell accordingly, sometimes resulting in the joints becoming visible in the form of small hairline cracks where the components are fitted during the assembly process. This is a natural occurrence that can be minimized by maintaining a stable environment. The strength and integrity of the door is not compromised by these hairline cracks. Because this is a natural occurrence, Leedo cannot accept responsibility for the inherent properties of wood and wood products, specifically hairline cracks that occur when environmental changes occur.

Specifications within this document supersede any previous catalogs. Leedo reserves the right to make specification changes for continued product improvement. All designs and specifications are subject to change without notice as needed due to changes in material availability or manufacturing process changes.

All photography and illustrations in this catalog should be used for inspiration purposes only. The appearance of actual colors or wood grains may vary due to the printed publication process. Customers are urged to view an actual sample for a realistic representation of wood grains and color tones.

Select styles and/or box construction types are KCMA and CARB2 compliant.
