WOOD CHARACTERISTICS & PRODUCT DISCLOSURE I3

INDEX J2-J8

STANDARD PARTICLEBOARD FRAMED CONSTRUCTION AND OPTIONS

- 1 FRONT FRAME** — 3/4" thick kiln dried solid hardwood. Assembled under pressure with mortise and tenon construction. Frame joinery reinforced with mechanical fasteners. Stiles and Rails are 1-1/2" wide. Mullions are 3" wide.
- 2 END PANELS** — 1/2" thick wood based composite panel dadoed to receive tops and bottoms, with natural or white laminate interior surface and matching laminate exterior surfaces. All end panels are inserted into dado in face frame.
- 3 TOP/BOTTOM PANELS** — 1/2" thick wood based composite panel with natural or white laminate on exterior and interior surfaces for wall cabinets and interior surface for base cabinets. Tops and bottoms are set into dadoes in end panels and front rails, reinforced with glue and staples.
- 4 HANG RAILS** — Wall and base cabinets have 1/2" thick wood based composite hanging rail. Assembled between the end panels at the top and bottom of cabinets behind the back panel.
- 5 BACK PANEL** — 1/8" thick hardboard with natural or white laminate interior surface. Securely glued with industrial grade hot melt to end panels and hang rails.
- 6 SHELVES** — **Standard:** Base cabinets come standard with half depth adjustable shelves. Wall cabinets feature full depth adjustable shelves. **Standard:** 3/4" thick wood based composite panel with natural or white laminate on both faces and matching edgeband on front edge.
Full Depth Shelf (FDS) Upgrade Option: available on select base cabinets.
- 7 TOE KICK** — **Standard:** 1/2" thick unfinished wood based composite panel assembled between end panels. Toe kick is 4-1/2" high for standard base cabinets and 5-1/2" high for universal access base cabinets.
No Toe Kick (NTK) Upgrade Option: available on select vanity cabinets.
- 8 DRAWER BOX** — **Standard:** 1/2" thick laminate wood based composite panel sides and ends. Rabbet-jointed, assembled with glue and staples. Drawer bottoms are 1/8" laminated composite panel. Bottom is captured in dadoes on ends and sides and secured in place with hot melt glue. Available with standard or upgraded undermount soft-close guides. Available in natural or white finish.
Plywood Upgrade Option: 1/2" thick plywood sides and ends. Rabbet-jointed, assembled with glue and staples. Drawer bottoms are nominal 1/8" laminated plywood. Bottom is captured in dadoes on ends and sides and secured in place with hot melt glue. Available with standard drawer guides only.
Plywood Dovetail Upgrade Option: 1/2" thick plywood sides and ends with dovetail construction. Drawer bottoms are nominal 1/8" laminated plywood. Bottom is captured in dadoes on ends and sides and secured in place with hot melt glue. Available with standard or upgraded undermount soft-close drawer guides.
- DRAWER GUIDES** — **Standard:** 100lb rated epoxy coated side mount guides.
Undermount Soft-Close Upgrade Option: Full extension with 100lb rated undermount guides with integrated soft-close feature. Available for the standard particleboard drawer box and the plywood dovetail drawer box.
- 9 HINGE** — **Standard:** 6-way adjustable, concealed steel hinges.
Soft-Close Upgrade Option: 6-way adjustable, concealed steel hinges with soft-close feature.
- 10 DOORS** — Please refer to individual door style specifications.

ALTERED DEPTH (AD) Option — Most wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18" or 21" depth. AD availability is noted by cabinet.

ROUTE FOR GLASS DOORS (RFG) Option — Route for glass door option is available for select wall cabinets. This option will automatically come with a matching laminate interior. Doors prepared for glass do not include glass or glass fasteners. RFG is not available for Fulton, Lucina or Parker door styles.

1 FRONT FRAME — 3/4" thick kiln dried solid hardwood. Assembled under pressure with mortise and tenon construction. Frame joinery reinforced with mechanical fasteners. Stiles and Rails are 1-1/2" wide. Mullions are 3" wide.

2 END PANELS — 1/2" thick plywood dadoed to receive tops and bottoms, with natural or white laminate interior surface and matching laminate exterior surfaces. All end panels are inserted into dado in face frame.

3 TOP/BOTTOM PANELS — 1/2" thick plywood with natural or white laminate on exterior and interior surfaces for wall cabinets and interior surface for base cabinets. Tops and bottoms are set into dadoes in end panels and front rails, reinforced with glue and staples.

4 HANG RAILS — Wall and base cabinets have 1/2" thick plywood hanging rail. Assembled between the end panels at the top and bottom of cabinets behind the back panel.

5 BACK PANEL — 3.6mm thick plywood with natural or white laminate interior surface. Securely glued with industrial grade hot melt to rabbeted end panels and hang rails.

6 SHELVES — Base cabinets come standard with half depth adjustable shelves. Wall cabinets feature full depth adjustable shelves. Standard: 3/4" thick plywood panel with natural or white laminate on both faces and matching edgeband on front edge.

Full Depth Shelf (FDS) Upgrade Option: available on select base cabinets.

7 TOE KICK — **Standard:** 1/2" thick unfinished plywood panel assembled between end panels. Toe kick is 4-1/2" high for standard base cabinets and 5-1/2" high for universal access base cabinets. **No Toe Kick (NTK) Upgrade Option:** available on select vanity cabinets.

8 DRAWER BOX — **Standard:** 1/2" thick plywood sides and ends. Rabbet-jointed, assembled with glue and staples. Drawer bottoms are nominal 1/8" laminated plywood. Bottom is captured in dadoes on ends and sides and secured in place with hot melt glue. Available with standard drawer guides only.

Plywood Dovetail Upgrade Option: 1/2" thick plywood sides and ends with dovetail construction. Drawer bottoms are nominal 1/8" laminated plywood. Bottom is captured in dadoes on ends and sides and secured in place with hot melt glue. Available with standard or upgraded undermount soft-close guides.

DRAWER GUIDES — **Standard:** 100lb rated epoxy coated side mount guides.

Undermount Soft-Close Upgrade Option: Full extension with 100lb rated undermount guides with integrated soft-close feature. Available for the plywood dovetail drawer box.

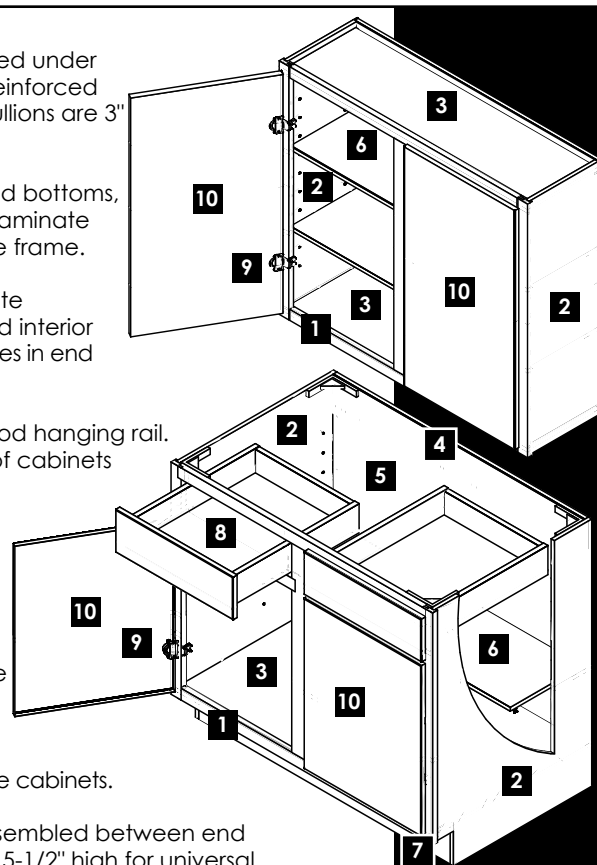

9 HINGE — **Standard:** 6-way adjustable, concealed steel hinges.

Soft-Close Upgrade Option: 6-way adjustable, concealed steel hinges with soft-close feature.

10 DOORS — Please refer to individual door style specifications.

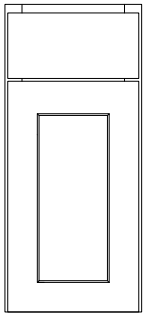

ALTERED DEPTH (AD) Option — Most wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18" or 21" depth. AD availability is noted by cabinet.

ROUTE FOR GLASS DOORS (RFG) Option — Route for glass door option is available for select wall cabinets. This option will automatically come with a matching laminate interior. Doors prepared for glass do not include glass or glass fasteners. RFG is not available for Fulton, Lucina or Parker door styles.

NOTE: Shown with 18" deep microwave shelf (MWS3018) ordered separately.

TRIMMABLE MICROWAVE WALL CABINETS WITH BUTT DOORS

- Two hinges per door
- Designed to be trimmable to accommodate built in microwave
- Opening Size is 12" H x 24" W
- Maximum cutout dimensions is 19-1/2" H x 28" W
- Color matching laminate interior
- **Microwave shelf (MWS3018) must be ordered separately for use with 12" deep cabinet and shelf can be modified in the field**
- **See page D9 for shelf specs**
- **Refer to appliance manufacturer specifications for proper clearance and ventilation requirements**
- **Vertical stiles in microwave opening are each 3" wide. Trimmable panel is 9" tall**
- **Altered Depth (AD) Option: 18" and 21"**

STANDARD PARTICLEBOARD EURO FRAMELESS CONSTRUCTION AND OPTIONS

- 1 END PANELS** — 5/8" thick (nominal) wood-based composite panel with matching laminate exterior surfaces. Construction holes of 8mm to receive wood dowels of horizontal components. End panel is dadoed to receive the back panel.
- 2 TOP/BOTTOM PANELS** — 5/8" thick (nominal) wood-based composite panel attached to the end panels with wood dowels and glue. Base bottom also rests over the toe kick and rear stretcher for better support. The tops and bottoms dadoed to receive back panel.
- 3 HANG RAILS** — 5/8" thick (nominal) wood-based composite panel. Hang rails are set underneath the top panel and above the bottom panel, always concealed behind the back panel. Our hang rails utilize wood dowel and glue construction. Cabinets 30" or wider feature a pocket screw at the center across the top and bottom for better strength.
- 4 BACK PANEL** — 3mm thick hardboard laminated on one side in white, or matching laminate exterior surface. Fully captured and stapled to end panels, bottom and top or upper stretcher for bases.
- 5 SHELVES** — 3/4" thick (nominal) wood-based composite panel with white laminate on both surfaces and matching edgeband on the facing edge. Wall cabinets feature full depth adjustable shelves. The Base cabinet features a half depth shelf with a frontal lock-in-place shelf clip.
Full Depth Shelf (FDS) Upgrade Option: available on select base cabinets.
- 6 TOE KICK** — **Standard:** 5/8" thick (nominal) unfinished wood-based composite panel. Toe kick is 4" high.
No Toe Kick (NTK) Upgrade Option: available on select vanity cabinets.
- 7 BASE STRETCHERS** — 5/8" thick (nominal) unfinished wood-based composite panel, 3-3/4" width, running from left to right on the front and back at the top of the base cabinet. Front stretcher features matching exterior edgebanding on the facing side.
- 8 DRAWER BOX** — **Standard:** 5/8" thick (nominal) particleboard sides and end with 3mm captured drawer bottom. Drawer parts are laminated white. Partial extension 100lb rated drawer guide is standard.
Drawer Guide Upgrade Option: Full extension, 100lb rated, undermount guides with integrated soft-close feature.
Double Wall Drawer System Option: Double-wall drawer system with integrated soft close feature. High quality epoxy coated steel construction with synchronized full extension soft-close drawer slides. Integrated height and width adjustments. Drawers have 5/8" thick (nominal) particleboard drawer bottoms and backs with a rating of 88 lbs dynamic load capacity. Drawer box interior & exterior finish is white.
- 9 HINGE** — **Standard:** 6-way adjustable concealed clip on hinges with 107 degree opening. **Soft-Close Upgrade Option:** 6-way adjustable concealed steel hinges with soft-close feature.
- 10 DOORS** — Please refer to individual door style specifications.
ALTERED DEPTH (AD) Option — Select wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18", 21" or 22" depth. AD availability is noted by cabinet within the Product Specifications Guide.
ROUTE FOR GLASS DOORS (RFG) Option — Route for glass door option is available for select wall cabinets. This option will automatically come with a matching laminate interior. Doors prepared for glass do not include glass or glass fasteners. RFG is not available for Forza, Lucerne, or Parc door styles.

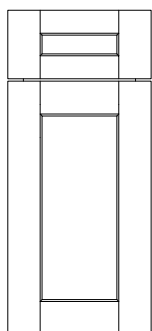

- 1 END PANELS** — 5/8" thick (nominal) plywood with matching laminate exterior surfaces. Construction holes of 8mm to receive wood dowels of horizontal components. End panel is dadoed to receive the back panel.
- 2 TOP/BOTTOM PANELS** — 5/8" thick (nominal) plywood attached to the end panels with wood dowels and glue. Base bottom also rests over the toe kick and rear stretcher for better support. The tops and bottoms are dadoed to receive back panel.
- 3 HANG RAILS** — 5/8" thick (nominal) plywood panel. Hang rails are set underneath the top panel and above the bottom panel, always concealed behind the back panel. Our hang rails utilize wood dowel and glue construction. Cabinets 30" or wider feature a pocket screw at the center across the top and bottom for better strength.
- 4 BACK PANEL** — 3mm thick plywood laminated on one side in white, or matching laminate exterior surface. Fully captured and stapled to the end panels, bottom and top or upper stretcher for bases.
- 5 SHELVES** — 3/4" thick (nominal) plywood panel with white laminate on both surfaces and matching edgeband on the facing edge. Wall cabinets feature full depth adjustable shelves. Base cabinets features a half depth shelf with a frontal lock-in-place shelf clip. Full Depth Shelf (FDS) Upgrade Option: available on select base cabinets.
- 6 TOE KICK** — **Standard:** 5/8" thick (nominal) unfinished plywood. Toe kick is 4" high.
No Toe Kick (NTK) Upgrade Option: available on select vanity cabinets.
- 7 BASE STRETCHERS** — 5/8" thick (nominal) plywood, 3-3/4" width, running from left to right on the front and back at the top of the base cabinet. Frontal stretcher features matching exterior edgebanding on the facing side.
- 8 DRAWER BOX** — **Standard:** 12mm thick plywood drawer sides and ends with 3mm thick, laminated plywood drawer bottom. Plywood drawer box is natural finish. Partial extension 100lb rated drawer guide is standard.
Drawer Guide Upgrade Option: Full extension 100lb rated undermount guide with integrated soft-close feature.
Double Wall Drawer System Option: Double-wall drawer system with integrated soft close feature. High quality epoxy coated steel construction with synchronized full extension soft-close drawer slides. Integrated height and width adjustments. Drawers have 15mm thick plywood drawer bottoms and backs with a rating of 88 lbs dynamic load capacity. Drawer box interior & exterior finish is white.
- 9 HINGE** — **Standard:** 6-way adjustable concealed clip on hinges with 107 degree opening.
Soft-Close Upgrade Option: 6-way adjustable concealed steel hinges with soft-close feature.
- 10 DOORS** — Please refer to individual door style specifications.
ALTERED DEPTH (AD) Option — Select wall cabinets can be increased to a 15" or 18" depth. Select base cabinets can be decreased to a 15", 18", 21" or 22" depth. AD availability is noted by cabinet within the Product Specifications Guide.
ROUTE FOR GLASS DOORS (RFG) Option — Route for glass door option is available for select wall cabinets. This option will automatically come with a matching laminate interior. Doors prepared for glass do not include glass or glass fasteners. RFG is not available for Forza, Lucerne, or Parc door styles.

OVERLAY FRONTS

- Overlays are shipped loose for field installation
- Filler or Return Panel must be ordered separately
- Overlays are finished on all sides
- Grain direction matches door grain direction
- OFTs will ship as two pieces when a horizontal grain is required
- Overlay fronts are slab styling and made from door material
- Overlays have an outside profile that matches the selected door style

INDEX AND WARRANTY

INDEX AND WARRANTY

INDEX AND WARRANTY

INDEX AND WARRANTY

A soft cotton cloth dampened with warm water is usually sufficient to clean your cabinets. If more thorough cleaning is required, use one of the following cleaning solutions:

- A mixture of dish washing liquid and warm water
- A mild all-purpose cleaner. **Make sure it does not contain ammonia, silicone, or acid.**

Using the mildest cleaning solution will successfully clean your cabinets. Stronger products may damage or discolor your cabinet finish and are not recommended. After cleaning, wipe all surfaces with a clean, damp cloth. Dry immediately, using another soft, clean cloth.

SPILLS

Clean spills immediately. Prolonged exposure to spills, including food, water or other liquids, or grease spills can cause permanent discoloration or damage to your cabinet's finish.

CLEANING PRODUCTS TO AVOID

- Harsh chemicals including ammonia and bleach
- Abrasive cleaning products such as tub and sink cleaners scouring powder, scouring pads, or steel wool
- Sponges or dish clothes. They may contain particles that could scratch your cabinets, or they may contain food and oil residue
- Solvent-based or petroleum-based products such as mineral spirits, nail-polish removers or paint thinners
- Silicone-based cleaning, waxing or polishing products

REGULAR DUSTING

Use a clean, soft, lint-free cotton cloth for regular dusting. Packaged dusting sheets are not required or recommended. **Do not use pre-moistened dusting sheets or aerosol products specified for dusting.**

WAXING AND POLISHING

Waxing is not required or recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinets and cause a hazy, streaky or yellowed appearance.

Thank you for selecting Leedo Cabinetry. Leedo works hard to provide an excellent product at a very competitive price. We guarantee all Leedo products for a period of One (1) year from the date of the completion of project installation to be free of defects in materials and manufacturing. During this period we agree to replace, at no cost to the owner, any portion of our work that is found defective.

While Leedo guarantees all structural aspects of our products for a period of one year, the following exclusions do apply:

- Due to the naturally occurring variations in wood, we do not guarantee uniformity of color, tone or grain pattern; nor do we guarantee that stain or finish colors will be free of minor inconsistencies caused by natural variations in pigments and materials.
- Hairline cracks or visible joint separations are considered normal changes that can occur with wood products based on environmental conditions.
- Damage caused by normal wear and tear, abuse, neglect, misuse, alterations, water damage, or other environmental conditions such as exposure to extreme temperatures or humidity.
- Damage caused by exposure to excessive heat sources.
- Work done by others, including refinishing or removal of cabinets.
- Thermofoil cabinetry installed without protection from excessive heat sources. Heat shields and/or fillers and overlays should be used to protect cabinetry near appliances that emit heat.
- Touch-ups, door and drawer adjustments, or cosmetic work.
- Color changes that may occur due to natural aging of the wood or due to exposure to either natural or artificial light.
- Discoloration or dullness in the finish or wood stain that may occur after exposure to ultraviolet light.
- Small or hairline cracks on painted product that may become visible at connecting joints. Please refer to painted product disclosure.

Leedo Manufacturing will make the final determination on any warranty-related items. Should a defect in materials or workmanship occur, excluding those noted above, Leedo maintains the right to repair or replace the product at our discretion.

Leedo works hard to provide an excellent product at a very competitive price. We select the best cabinet material suitable for the manufacturing of a finished cabinet that meets our customers needs and KCMA standards. Our machining, assembly, and finishing procedures operate together to provide the highest quality of performance and appearance that our customers require to match the demanding lifestyle of their end users. Our finishing materials and application methods are consistently tested and inspected for quality and consistency using the latest technology.

Wood of all species is hygroscopic, meaning that it is subject to the humidity and temperature of its environment. It will lose or gain moisture and consequently shrink or swell depending on the environment. Even protective coatings cannot prevent this movement; they merely impede the process.

Painted Finishes

When the final product is painted, the solid colored paints and glazes mask the joint on assembled wood components. Due to the naturally occurring variations in wood that are beyond Leedo's control, we do not guarantee that the connecting joints will remain hidden by the paint. The wood components shrink or swell accordingly, sometimes resulting in the joints becoming visible in the form of small hairline cracks where the components are fitted during the assembly process. This is a natural occurrence that can be minimized by maintaining a stable environment. The strength and integrity of the door is not compromised by these hairline cracks. Because this is a natural occurrence, Leedo cannot accept responsibility for the inherent properties of wood and wood products, specifically hairline cracks that occur when environmental changes occur.

Wood Products

All wood products can be impacted by climate changes in humidity and dryness that may cause doors, drawers, or face frames to swell, shrink or warp over a very short period of time. Customers are responsible to store delivered products appropriately. Cabinets should not be stored in areas that are exposed to open air, moist environments, prolonged heat/dryness, chemicals or paint fumes. Leedo is not responsible or liable for products that shrink or swell after acceptance by customer.

Wood Panel Patch Disclosure

Leedo works diligently to provide quality materials for all products. Due to challenging supply chains and availability of materials, Leedo may find it necessary to substitute or replace products over time. Visible holes in wooden products is considered a natural variability of wood and not considered a product defect. Plywood panels with oval patches to conceal holes or knots may be used on cabinetry. These patches will not normally be visible once the cabinetry is installed.

Decorative Hardware Application

Customers are responsible for the careful installation of decorative hardware. Caution should be taken when drilling for hardware to avoid areas with visible joints or wood imperfections that may cause the wood or substrate to split.
